

HORSES INSIDE OUT

DISSECTION PROGRAMME WINTER 2010

This hands-on day course offers an insight in to the anatomy of the horse and provides a rare and invaluable opportunity to look at the structures that can be influenced by training and therapy.

This is the first in a series of dissections to be led by **Dr. Andrew Hemmings**, an experienced neuroanatomist and principal lecturer in Animal Science at the Royal Agricultural College, Cirencester. Subsequent dissections will be arranged and published at a later date. Andrew will demonstrate and explain any techniques required. Many traditional, alternative and complimentary therapies exploit the reciprocal interaction between external sensory structures such as the skin, and the internal such as the muscles. This guided dissection will give a unique insight into equine function, and the composition of the muscular skeletal structure.

The Spine	Saturday 11 th December 2010	£85.00
-----------	---	--------

09.30 Registration and Coffee

10.00 Start
